Akamai Technologies - RFP for New Build Solar or Wind

Updated July 2026

Akamai is posting a VPPA request by region and fuel type on **Resurety's CleanTrade platform.** All offers will be posted, negotiated, and transacted directly on the platform.

Overview of procurement need

Akamai is looking to address future supply needs with the following specifications:

- **Total volume:** 700,000 - 1,100,000 MWh/yr
- **Project sizing:** Akamai is seeking a "basket" of opportunities and will accept partial offtake and projects as small as 20,000 MWh/yr.
- **Regions:** Priority for ***PJM MISO Central Zones (4-7), SPP (SWPW preferred), and/or CAISO (Palo Verde Only)***
- **Technology:** Solar (preferred) and Wind.
- **Tenor:** 10–12 years preferred (up to 15 years considered).
- **COD:** 2026/2027/2028/2029 (Greenfield/New Build only).

Decision Criteria & Evaluation Framework

Resurety will perform generation, financial settlement, and carbon impact calculations for every offer received via the CleanTrade platform using our Weather Smart Fundamentals Modeling. Offers will be evaluated based on the following areas and reflective of the four vital themes of Akamai's procurement philosophy:

1. Total Cost & ROI
2. Emissionality (The "North Star"): *Projects will be evaluated using their real-world carbon abatement and implied value of carbon. We utilize Resurety's Locational Marginal Emissions (LME) data to prioritize projects that displace the most carbon-intensive marginal generation.*
3. Grid Impact & Technology
4. Market Integrity & Transparency: *All offers must be transacted exclusively via CleanTrade, the industry's only CFTC-regulated platform. This ensures a transparent audit trail and rigorous financial modeling for all participants.*
